ZORIAN MART

Growth Product Manager / Associate Product Manager

Kyiv, Ukraine / Lancaster, UK | zoryan2006@gmail.com | linkedin.com/in/zorian-mart | English: C2 (Fluent)

PROFESSIONAL PROFILE

Product Manager with a strong engineering background in Computer Science and Business Analytics. Graduate of Genesis Product School 5.0. Skilled across the full product management lifecycle: identifying growth opportunities, conducting in-depth CustDev interviews and unit economics analysis, translating requirements into technical specifications, and delivering releases. Proven hands-on experience leading engineering teams of 6, launching products from scratch, developing backend systems, and scaling Google Developer Groups communities. Focused on optimizing Time-to-Market, improving TTV and Retention metrics, and validating business hypotheses through high-quality MVPs.

EXPERIENCE & PRODUCT PROJECTS

Growth Product Manager **Oct. 2026 – Present**

Futurra Group *Kyiv, Ukraine*

- **End-to-End Growth & Experimentation:** Own the full lifecycle of product growth initiatives for global EdTech applications—from data discovery, UX research, and RICE prioritization to writing PRDs, running A/B tests, and scaling validated features.
- **Post-Purchase Monetization & LTV:** Optimize post-purchase funnels, user onboarding flows, and upsell/cross-sell mechanics, increasing Day-30 Retention by 9% and boosting cohort LTV by 14%.
- **Data Analytics & Funnel Optimization:** Build and maintain product analytics dashboards in Amplitude to track cohort behavior, identify drop-off bottlenecks across the user journey, and systematically reduce early-stage churn.
- **Cross-Functional Delivery:** Lead execution across engineering, product design, and marketing teams within Agile sprints, streamlining hypothesis validation cycles and reducing Time-to-Market for new product experiments.

Project Manager & Technical Lead (Regional Transport System) **Jan. 2026 – Jun. 2026**

Lancaster University *Lancaster, UK*

- **Leadership:** Led a team of 6 engineers in developing a production-grade transport system; shortened release cycles by implementing Agile/Scrum and automated CI/CD pipelines.
- **Strategic Delivery:** Coordinated the preparation of detailed architectural documentation and delivered the final presentation and interactive demo to technical and business stakeholders.
- **Algorithm Optimization:** Improved routing algorithm performance by 50% through the integration of RAPTOR and OSRM configuration, achieving trip calculation times of <200 ms and improving user TTV.
- **Frontend Engineering:** Designed the architecture of a client-side React application focused on navigation UX, optimized multimodal search, and smooth live transport telemetry rendering.

Software Engineer Intern (Backend & Internal Tools) **Jun. 2025 – Aug. 2025**

Mine Tech Services (MTS) *Remote*

- **Backend Architecture:** Developed reliable backend microservices and data validation logic in C# and ASP.NET Core, ensuring secure storage of critical business data through Entity Framework Core.
- **Workflow Optimization:** Accelerated API testing processes by 35% by standardizing Swagger documentation and implementing automated test collections in Postman.
- **CI/CD & Deployment:** Collaborated with a cross-functional team to optimize cloud release pipelines, reducing the deployment time for new versions by 20%.

LEADERSHIP & COMMUNITIES

Leader & Campus Representative **Jan. 2026 – Present**

Google Developer Groups (GDG) on Campus *Lancaster, UK*

- **Strategic Leadership:** Lead an official Google-supported community chapter, coordinate the leadership team, and scaled the local community to 30+ active members.
- **Ecosystem & Event Orchestration:** Partnered with Google representatives to organize a series of hackathons and workshops, teaching students industry frameworks and collecting feedback through NPS.
- **Mentorship & Operations:** Administer the chapter platform, mentor beginners, and help students integrate into the development standards of real-world product IT companies.

Founder & President **Nov. 2025 – Present**

Lancaster University Game Dev Society *Lancaster, UK*

- **Strategic Foundation:** Founded the official university game development society with 20+ members, securing funding and campus resources.
- **Technical Project Management:** Organize regular game jams and sprints, guiding cross-functional student teams in releasing completed full-stack projects using Unity and Git.

EDUCATION & PRODUCT PROGRAMS

Genesis Product School 5.0 **May 2026 – Sept. 2026**

Genesis Academy *Kyiv, Ukraine*

- **Practical Intensive Program:** Unit Economics (LTV, CAC, Payback), product funnel analysis, cohort Retention analysis, paywall optimization, A/B testing, and Growth mechanics.

Lancaster University **2024 – 2027 (Expected)**

BSc Computer Science, Minor in Operational Management & Business Analytics *Lancaster, UK*

- **Predicted Grade:** First Class (Honours). Focus: Systems Design, Data Analytics, Quantitative Decision Making, Machine Learning.

SKILLS & TOOLS

Product Management & Analytics: CustDev, Product Discovery, Unit Economics, Funnel & Retention Analysis, A/B Testing, RICE/ICE, Agile/Scrum, PRD, Product Roadmapping.

Technical Acumen & Architecture: Full-Stack Architecture, SQL, Python, REST APIs, WebSockets, C#, ASP.NET Core, React, Git, Rapid Prototyping (Vibe Coding, AI tools).

Tools & Environment: Jira, Figma, Postman, Amplitude, Notion, Slack, VS Code, Excel, Claude, AI Studio, Docker.
